NEW AND IMPORTANT DISCOVERY.

DR. PHILLIPS' COMPOUND

TOMATO PILLS,

[ENTIRELY VEGETABLE.]

A New and Invaluable Medicine for all Diseases arising from Impurities of the Blood, Morbid Secretions of the Liver and Stomach; also,

THE INSTITUTE FOR CALOMEL;

[use Cathartic in Fevers and all Bilious Affections.]

THESE popular Pills being a combination of a newly discovered Alkaline substance, extracted from the TOMATO PLANT, with other vegetable substances which have been found to modify and diffuse its effects, are believed to be the best Alternative and Cathartic Medicine ever discovered.

They have been abundantly and successfully tried, and have received universal approbation for Sciatica, Dyspepsia, Jaundice, Bilious Diseases, Gout, Rheumatism, Cough, Colds, Inflammation, Catarrh, Nervous Diseases, Acid Diarrhoea, Glandular swellings of all kinds, Costiveness, Cholic, Headache, &c.

They are an antidote to Contagious and Epidemic diseases, prevent the formation of Bilious and Liver affections, Fever and Auge, &c., in those who reside in hot climates, and low and marshy countries, and are the best Cathartics used for those localities. Seamen will find them an AMALGAM, ready to the EX-ARMED TRAVELLERS, the best medicine they can use to counteract the dangers of exposure in unhealthy climates. For ordinary family physic, they are highly recommended, as the best ever offered.

These Pills have a powerful and salutary operation upon the Glandular System, removing all obstructions from the glands, wherever situated, Scrofulous and Sycophantic Taints in all their forms, and if persevered in, in cases of Scrofula, however severe, can resist its influence. It is in their operation on the Glandular System, that their effects are peculiar and potent, and so greatly resemble that of Calomel. In fact, the Tomato has all the Alternative Deobstruent and Cathartic properties of Calomel, without ever producing unpleasant or injurious effects under any circumstances, either from exposure to cold or wet; on the contrary, the Compound Tomato Pills are the best remedy ever known to counteract the effects of Mercury, completely eradication every particle of it from the system, and removing the constitution broken down by its use; which it does by correcting the state of the blood, and through that, correcting the morbid secretions of the glands, and restoring them to a healthy and their own proper action. Its effects are analogous to Sassafras and Blood-Root, and in its combination in the ingredients composing the Pills, it exhibits a universal action peculiar to itself.

The peculiar virtues of the Tomato Plant, have for a long time attracted the attention of the Medical profession, and the Public; and a lively interest has recently been directed to the future development of its active powers, and its Antidotes and Alternative qualities; which the Proprietor is now happy in being able to gratify, and presents his Pills to the Public, with the full confidence of their being the most safe and valuable remedy ever discovered, adapted to all cases where nature is disturbed, and when any of the functions do not perform their natural or healthy action.

For the Druggists in Bangor and throughout the State. Address CONSTOCK & CO., New York.

DR. E. SPONH, a German physician of much note, having devoted his attention to the study and removal of the causes of the NERVOUS AND STICK-HEDACHE, has the satisfaction to make known, that he has a remedy which for removing the causes effectively and personally this distressing complaint. There are many families who have considered SICK Headache a constitutional incurable family complaint. Dr. S. assures them that they are mistaken and laboring under distress which they might not only alleviate, but eradicate by the use of his remedy.

It is the result of scientific research, and is entirely of a different character from advertised patent medicines, and is no unpleasing to the taste.

Sold every Drugstore in Bangor and throughout the State. Address CONSTOCK & CO., New York.

Sept. 10.

LAST DAY.

HAVE YOU A COUGH? Do not neglect

thousands have met a premature death for the want of a little attention to a common cold.

Have you a cough? Rev. Dr. Bartholomew.

Expectorant Syrup, a safe medical prescription,

containing no poisonous drugs, and used in an extensive practice for several years, will not only

afford relief, and save you from that awful disease, pulmonary Consumption, which usually

wraps the brave hundreds of the young, the old, the fair, the lovely and the gay!

BANGOR WHIG.

THURSDAY, JUN 10, 1841.

HARTFORD ASYLUM. We have received the 26th Report of the Directors of this institution, from which it appears to be in a flourishing condition.

The number of pupils in the Asylum within the last year was 165, 21 of which were from Maine. But 2 of the whole number received their entire supply from the Asylum. 127 were beneficiaries of the trustees and other public bodies, and 16 were paying pupils.

Julia P. is a sick, dumb, and blind girl, is still in the institution. The last was the sixteenth year of her residence there. Signs the 21st Report, (1837) which contained a lengthy account of her case, nothing peculiarly interesting has occurred in regard to her mental habits or her general condition. Her forlorn condition became known, some years since, to a benevolent lady of Massachusetts, the late Mrs. Martha Johonnot, of Salem, who provided in her will, that within a specific time after her own decease, an annuity of \$200 should become available for Julia's support. This provision took place during the last year, and it is understood that her executors are making arrangements to carry her benevolent intentions into effect. This provision will probably be ample for Julia's support, of which the Asylum will of course be relieved; yet, unless unforeseen circumstances should render a change of residence necessary, it is expected that she will remain an inmate of the Asylum, under the legal guardianship of one of its officers.

The health of our people continues the best, the condition remarkably good throughout the year. Every case of sickness except one, has readily yielded to judicious treatment, and few have occurred requiring the attendance of a physician. The excepted case was one of dysentery, and the subject of it an interesting young woman from the State of Maine. This case furnishes an instructive comment upon the value of that education which is here imparted to the deaf and dumb. During the whole of her illness she was patient and submissive. She evinced no alarm in view of the progress of her disease and her evident danger. She was grateful for the sympathy and kind attentions she received; was reasonable in all her requests, expressed no anxiety to recover, and none from the fact that her distant parents and friends could not visit her. She seemed on the contrary, willing to commit herself into the hands of her Creator, in the spirit of penitence, of Christian confidence, of resignation and hope of a better life. Three years and three months before, this young person was in utter ignorance of all religious truth.

CONGRESS. In the Senate, on Friday, Mr. Clay of Ky. introduced a bill to repeal the Sub-Treasury. It is as follows:

A BILL

To repeal the act entitled "An act to provide for the collection, safe keeping, transfer and disbursement of the public revenue," and to provide for the punishment of embezzlers of public money.

Sec. 1. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the act entitled "An act to provide for the collection, safe keeping, transfer and disbursement of the public revenue," approved on the 4th day of July, A. D. one thousand eight hundred and forty, be and the same is hereby repealed, provided, always that for any offence which may have been committed against the provisions of the seventeenth section of the said act, the offender may be prosecuted and punished according to those provisions, any thing herein contained to the contrary notwithstanding.

Sec. 2. And be it further enacted, That if any officer charged with the safe keeping, transfer or disbursement of public monies, so connected with the Post-Office Department, shall convert to his own use in any way, whatever, or shall use by way of investment in any kind of property or merchandise, or shall loan with or without interest any portion of the public monies entrusted to him for safe keeping, transfer, disbursement, or for any other purpose, every such act shall be deemed and adjudged to be an embezzlement of so much of the said monies as shall be thus taken, converted, invested, used or loaned, which is hereby declared to be a felony; and the refusal to pay over or demand any public moneys in his hands, upon the presentation of a writ drawn upon him and signed by the Secretary of the Treasury, shall be prima facie evidence of such conversion to his own use, of so much of the public moneys as may be in his hands. Any officer or agent of the United States, and all persons advising, or knowingly and wilfully participating in such embezzlement, upon being convicted thereof before any Court of the United States of competent jurisdiction, shall, for every such offence, forfeit and pay to the U. S. a fine equal to the amount embezzled, and shall suffer imprisonment for a term not less than six months, nor more than five years.

This bill having been read once, Mr. Clay asked that it be now read a second time. Mr. Wright A. C. said, so it should be done. After some discussion between Messrs. Clay, Wright and Calhoun, the bill was made the special order for 12 o'clock on Monday following.

Mr. Young and Tallmadge presented the motions asking for the passage of a General Bank-Bill. Mr. Clay A. C. said,

that any bank is not suggested in the President's bill, as at this time the bill is not. If this bill is to be disregarded, the session would be interminable, and nothing be accomplished. After a brief debate the matter was laid over to Monday, to which day the Senate adjourned.

The House was not in session this day.

THE MISTERIAN TO ENGLAND. The National Gazette informs us that the mission to England has been tendered to the Rev. John Dargan, of Boston, and that the majority of the members of the mission, by the administration of his talents, qualifications for the trust. Whether he will accept it is not yet decided.

For Farmers generally, we believe are now convinced of the impropriety as well as the hostility of destroying birds upon their premises. These little angels are very pleasant, and in many ways help the farmer in his business. To kill them may well be supposed offensive to Him who sees with equal eye, as God of all.

A hero perish, or a sparrow fall...

We feel quite an interest in these feathered messengers of heaven, and note little indignation at the treatment they receive in our Christian land. One of them came confidently and built its nest upon a little cedar within a foot of the door of the writer. It was an object we loved. But a heartless being bent down the tree, and caused one of the two eggs which it contained to roll out upon the door step, and the songster has disappeared. No - it's bad and rightly educated person will ever kill a bird or disturb its little nest.

We once heard an intelligent farmer declare that the annual profit of a hive of bees was equal to the profit on an acre of wheat. If this is a fact, we should suppose every farmer would engage in the business in a small way, at least. There is sometimes a difficulty in having more than one hive swarming at a time. This may be avoided by spraining a wire wire - it has been hanging upon the outside of the hive - they probably think it a natural shower, refer to the hive and will appear again in about half an hour.

Lectures on Phrenology. Morris Purkitt and

None, of Boston, propose giving a series of lectures on the subjects of Phrenology and Physiology, commencing on Saturday evening at the City Hall. They have just completed a course

of lectures in Portsmouth, which was attended by large numbers of the most intelligent citizens of that place, who have expressed their high gratification with the manner in which the subjects were discussed, in a series of resolutions published in the last Portsmouth Journal. These

gentlemen doing among us highly recommended, and we doubt not their lectures here will be well attended, and much valuable information imparted.

It is surprising, says the Journal of Commerce, how quickly a few dashes of Mr. Webster's pen have cleared up all the mysteries in the case of Alexander M'Leod. All now see

that as the act for which he was indicted, has been assumed by the British government, there

is no propriety in holding individuals responsible for it; but that we must seek for it, if at all, from the British Government. All that remains,

therefore, is to discharge M'Leod, without trial, though being in the bands of the Courts, he

must be set free by them, and not taken out by others. This, says the Journal, is the whole case in a nut shell, and it is as plain as A B C.

WITHDRAWAL.

Article 9. Any member may withdraw from

the Society at any time by coming before the

Society at a regular meeting and giving his rea-

sons for so doing.

ANNUAL MEETING.

Article 10. The Annual Meeting shall be on

the 4th day of July of each year, or upon such

day as the anniversary of our national indepen-

dence shall be celebrated.

REGULAR MEETING.

Article 11. There shall be a regular meeting

of the Society on Monday evening of each week,

at half past seven o'clock.

AMENDMENT.

Article 12. This Constitution may be amend-

ed by a vote, two thirds of the members present

at a meeting of the Society, if such amendment

shall be proposed at a previous meeting.

HEBRON LUCE, President.

JOHN T. HOSKINS, Vice Pres't.

WM. J. DAVIS, Sec'y.

EDMUND HOLT, Correspond Sec'y.

E. M. NEWHALL, Treasurer.

Per Order W. J. DAVIS, Sec'y.

On Sunday last an investigation was held at

the office of James Buchanan, the British Consul at New York, to investigate every particu-

lar respecting the President which could throw

any light on her fate. It was satisfactorily prov-

ed that the ship was in good trim when she left

New York, was not overladen and was found in

safe, sail, &c. The testimony in regard to

her strength and fastenings also was clearly

shown. - The testimony of Capt. Cole, of ship

Orpheus, of New York, which ship sailed in

company with the President, argued calculated

to strengthen the opinion that the President

foundered during a severe gale, soon after she

left New York.

According to the N. Y. Star, Capt. Cole stat-

ed that he sailed in company with the President

from New York on the 11th March last, that he

was in sight of her until the evening of the next

day. - The vessel was in a tre-

mendous heat and appeared to be laboring and

pitching very heavily. The Orpheus at the

same time was also laboring and pitching very

much, and had large quantities on deck.

Capt. Cole thinks the President must have

at this time been skipping heavy seas, that the

fires were probably extinguished, rendering the

vessel comparatively helpless. The storm

shifted the next morning, from N E. to S. E.

causing a still more tremendous sea, and the gale

continued with unabated fury until midnight

on the 13th. Capt. Cole also stated that it was his

further belief that the President did not survive

the gale, but foundered, with all on board, before

sundown on the 14th, or in less than twenty four

hours after he last saw her; and more probably

on the terrific night of the 12th of March. In

which opinion other learned gentlemen present

seemed fully to coincide.

A YANKEE ADMIRAL. It is stated in a N

Hampshire paper that a former citizen of that

State, Thomas E. Williams, has become an Ad-

miral. Count Zinzechoff, in the Russian Navy

is serving that he was in early youth a clerk in a

store at Meriden Bridge. Being naturally of

a generous, bold, and ardent temperament, no

sooner had he served out his time, than he

went to visit a relative in Portland for the

purpose of buying a ship, and, if possible, of ob-

taining employment in one. He, at length, suc-

ceeded. After one or two voyages, he was in

then dangerously ill at St. Petersburg, and upon

his recovery, through the aid of the American

consul, obtained a berth on board of a Russian

merchant vessel, as a privileged passenger. Af-

ter a protracted voyage, on their return home

the vessel was attacked by a pirates aboard;

owing to the bravery and skill of Williams,

the pirates were beaten off, and the vessel

arrived at her destined port in safety. The

Captain Alexander, hearing of this brilliant

expedition, and pleased with the bravery

and good conduct of Williams, so send for

him to visit his court as a reward. The result

of this was that Williams was appointed

Admiral of the Russian Navy. From this he has

been promoted to the rank of Vice-Admiral, and

is now serving in the U. S. Navy.

THE KNICKERBOCKER.

THE KNICKERBOCKER, a monthly publication, is now ready with the new number. It publishes an notice that they have received a number of various letters for the use of their subscribers, and it will contain various pictorial publications, which will add much to its interest. The author-subscriber, the organ of the work in Bangor, and will furnish it to subscribers by mail, or deliver it at their stops (free of expense) for 50 cents per month, or for 6 months. Specimen numbers by mail, on application to

W. H. FENNO,
Eastern Periodical Agency.

A. F. DUREN'S VENUS WATER.

THE true Remedy for the Sovereign Restorative of the head and produce!!! The subscriber, in the publick that after FORTY YEARS of study, ten of which have been years of intense labor and difficulty, he has discovered the only true remedy against the loss, the sovereign restorative to ease of a deficiency, and the grand producer of that most beautiful ornament of "the human form divine," THE HAIR! That it may be known that this Venus Water is a Balsamic, astringent, I will state that in the first year of my labors upon it, its application to the head for two consecutive seasons, was necessary to establish a good growth of hair, but now only one season is required, as you will see by my improvements upon it! And I have the personal satisfaction of knowing that the City of Bangor since two hundred and fifty six heads which were once bald, can, by the heavy growth of hair upon them, bear witness to the won-terful effects which this Venus Water has produced within fifteen months.

I will add a few of the certificates almost innumerable, which have been given me by individuals who have derived benefit from this Water.

Mr. T. D. ADAMS. Having availed myself of the extraordinary benefit of your Venus Water, I feel it my duty to the public, as well as to my self, to submit for their perusal, a plain statement of the facts in my case. I had been entirely bald for three years, and had lost my eye brows, during which time I tried the remedies of three physicians without any benefit.

In reading over the advertisement of your celebrated Venus Water, I concluded to try it, and now am the proprietor of a fine head of hair and a beautiful pair of eye-brows.

Miss E. A. WORTHINGTON,
Bengor, May 8, 1841.

This may certify, that I have used Mr. Adams' Venus Water for baldness of the head, and that it has restored me a good head of hair, where before using it the hair was entirely gone. I also have used other preparations which have started the hair, but it would come not again. But the Venus Water has restored so that it is strong and straightherefore I first lost it. And to all those who are troubled with baldness, I would say, procure and call on Thomas D. Adams, and try it immediately, and you will have your hair growing again with it.

ARTEMAS J. EGERTON.
Bengor, May 14, 1841.

This may certify, that for the last six months I have used T. D. Adams' Venus Water, and have the satisfaction to say that the top of my head, which for a long time was bald, is now entirely covered with a good growth of hair.

EDMUND HOLT.
Bengor, February 25, 1841.

I hereby certify that for the last two or three years my head has been bald, and that during that period, I have used a great number of applications recommended for their efficacy in restoring the hair, from which I have never received any benefit, some even having proved injurious, until the past summer, I made use of Thomas D. Adams' Venus Water, which has entirely exceeded my expectations, and covered my head with a strong growth of hair.

HANNAH PALMER.
Bengor, May 15, 1841.

This may certify, that the hair upon the top of my head, being nearly gone, and the remainder fast dropping off daily, I was induced by Mr. T. D. Adams, to try his Venus Water, and during the last year he has made frequent applications of it to my head. I have now a considerable growth of my hair, produced, as I suppose, by the use of his remedy.

E. HARRIS.
Bengor, Feb. 3, 1841.

This may certify that I called on Mr. T. D. Adams in May, 1840. I used his Venus Water for three months and it has produced as much hair as I could desire on my head.

NANCY SMITH.
Bengor, Sept. 1841.

This may certify that my head was entirely bald, and by the use of T. D. Adams' Venus Water for three months my hair has been restored.

Bengor, Feb. 15, 1841.

CALEB H. HOLMES.
I have used Mr. Adams' Venus Water for the growth of the hair for about six months, and am happy to say that it has answered every purpose in producing a good head of hair, and preventing the hair from coming out by combing.

MARY JONES.
Bengor, Feb. 8, 1841.

This may certify that for the last six months I have used Adams' Venus Water, and have the satisfaction to say that the top of my head which for a long time was bald, is now entirely covered with a good growth of hair.

WM. FROST.
Bengor, Feb. 12, 1841.

This may certify that for the last twenty years, the top of my head had been bald, but now is well covered with a good growth of hair. I used the Venus Water for four months.

Bengor, Feb. 15, 1841.

E. R. WARREN.

This certificate that I have used a preparation made by Mr. Thos. D. Adams of this city, to restore hair to the head, after it had fallen off, and having derived much benefit from it, I would cheerfully recommend its use to others.

Bengor, Feb. 16, 1841.

A. HOLTON.

The Venus Water is for sale by the proprietor at his room over the Post Office in this city.

Face to PORTLAND, \$3. 50 Miles Extra.

Boston, \$4. 50 Miles Extra.

Bangor, April 21, 1841.

"WINSLOW'S BOSTON, PORT-

LAND & BANGOR PACK-

AGE EXPRESS."

May 24.

THE subscriber having made arrangements

with the PORTLAND, and BANGOR

Steam Boat Companies, will travel constantly in

the Steamer PORTLAND between Boston and

Bangor, and Mr. J. L. SMITH, Agent, in the BANGOR

between Portland and Bangor, and attend to

all business entrusted to his care with promptness

and dispatch.

He will attend to the payment and collection of

NOTES, BRAFTS and BILLS, the purchase and

sale of MERCHANTISE &c. in Boston, and also

MOSSES, HARNDEN & CO. in New York,

Philadelphia and Baltimore.

All orders forwarded by him will be attended to

in time for answering by return boat.

He is on board each Boat on "Iron Safe," for

the safety of MONEY and other valuable pack-

ages.
